'S' Range

Sink Units

'S' Range Sink Unit Tops with heavy duty Bowls, manufactured from type 304 stainless steel, that form a single seamless unit with a satin polished finish and relief pattern wipe clean drainers. Anti drip edge to front and ends with a boxed upstand to the rear (Up stand 50mm high with 20mm return to wall. Front and end turn downs: 50mm). The heavy duty bowls have 38mm corner standing waste and overflow, complete with stainless steel strainer. All units are 900mm high to top of anti drip edge and are mounted on square section stainless steel legs with adjustable feet and stainless steel undershelf. The units can be supplied with mixer or column taps with traditional cross heads or lever operation. Valances to obscure the bowl when viewed from the front are also available as an option.

'S' Range Sink Units are delivered fully assembled but as a budget option can be supplied flat packed complete with tools and instruction for assembly.

'S' Range Sink Unit cross section

Guide to model codes **SSU** = 'S' Range Sink Unit. The next 3/4 numbers denotes the length and depth. 6 denotes 600mm deep, 65 is 650mm deep and 7 means the unit is 700mm deep. **D** denotes drainer and **B** means bowl, to indicate the layout of the Sink Unit. Therefore **DBBD**, from left to right, means drainer, bowl, bowl and drainer.

Non standard bowls and sink unit lengths available on request.

Sterilising Sink Units

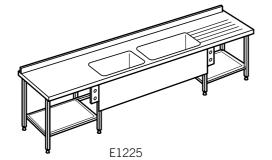

The range of sterilising sinks are manufactured to customer requirements, all tops are manufactured from 1.5mm thick type 304 stainless steel, welded construction to form a single seamless unit with satin polished finish. The top is 20mm deep with anti drip front and end edges and a 40mm boxed upstand to the rear. Heavy duty sterilising bowls have front operated waste valve with overflow. Heavy duty wash bowls fitted with corner standing waste or plug chain and overflow. The stainless steel understructure has adjustable feet and the unit is finished with a deep stainless steel apron to cover the sterilising bowls. Sterilising sinks are thermostatically controlled to operate at 82°C and are fully insulated. See the price list for a full range of accessories.

Dishwash Tabling

Dishwash tabling is normally built to suit individual requirements. Illustrated below is a typical layout which shows some of the options offered. Moffat can provide drawings for approval.

Dishwash tables are manufactured from stainless steel (type 304). The profile can be as our standard or a special as required. Dishwash table ends are shaped to suit the particular dishwash machine entry. The understructure is made from 30mm square section stainless steel and the legs are fitted with adjustable feet and come complete with undershelf as standard. Extras include scrapping chutes, welded in waste disposal hoppers, pre-rinse sinks and sprays, runners to accommodate dishwash baskets, watertight joints and special splashbacks. Please see price list for detailed specification.

Standard Dishwash Table

Bespoke fabrication

State of the art design

In addition to our 'off the shelf' range of products, E&R Moffat are at the leading edge of design for bespoke fabricated requirements.

Experienced designers with flare and vision are able to work closely with clients to fulfil their needs, suggesting innovative ways of using the latest materials coupled with clever use of space to create dynamic conditions.
