

Overview

These special tables are made to order to connect to any commercial pass through dish wash machine. Special flanged inlet/outlet ends are made to suit the wide variety of dishwash machines available on the market. Mounted on square section stainless steel tube legs with adjustable for level flanged floor fixing feet. Standard units have a stainless steel fixed under shelf set at 250mm from floor level. Dishwasher type tabling tops are manufactured from 304 type stainless steel. Specially designed and hand crafted to form a single seamless unit with a satin polished finish. Complete with anti-drip edges on three sides and a flanged dishwash machine entrance on one end. Additionally, units can be made to order with an extended rear ledge and a fully welded boxed upstand to the rear. Special bespoke units can also be made with sink bowls, basket runners underneath, waste hoppers, and scrap rings etc. Unlike standard thin sheet metal pressed type sink bowls which vary in thickness, E&R Moffat Ltd long-life hand-crafted bowls retain a constant thickness throughout. The sink bowls have a removable 38mm corner standing waste and overflow kit incorporating a heavy duty perforated stainless steel corner strainer or can be ordered with a standard centre positioned plug and waste.

Key Features:

- Tops made from 304 grade stainless steel
- Bowls are heavy duty, hand crafted in 304 grade stainless steel
- Standard Sink Bowl is 600mm long x 450mm wide 300mm deep
- Undershelf made from 430 grade stainless steel
- Legs are 30mm x 30mm square 430 grade stainless steel
- Feet are adjustable die cast flanged type

Bespoke options are available made to order for example:

L-shapes, U-shapes, extended rear ledges, special cut outs, special sized sinks bowls, rear overhead shelving. Cupboards underneath.

Options:

- Removable splashback
- Sink bowls
- Sink bowl covers
- Various optional hot and cold taps
- Bank of runners to hold baskets
- Welded in waste disposal units
- Scrap rings

Optional Roller Tables

Similar to the traditional type dish wash machine tables but made with a deeper well, and a lift out section fitted with multiple nylon rollers mounted to the sides. The special rollers allow the baskets of dishes to be moved along easily and smoothly.
