

MH9 Hot Cupboard Range

MH9 were design around the old school meal aluminium cooking pan dimensions 451mm x 270mm x 80mm; Therefore using Gn type pans is limited

A truly economical way of serving food. There are no expensive installation costs. Simply butt them together to form a continuous top and apply the brakes. If required up to three powered units can be inter-connected to one 13 amp plug. Simply set up in any area available for use during meal times and speedily remove after service when the area reverts to its normal function.

Optional tray slide and ambient serving shelf available.

Hinged Trayslide

Heated overshelves are not suitable for use with this range.
