

Important Design Parameters

Allowances must be made for air venting.
The under slung compressor must have an unrestricted air flow.
Proper venting must be provided ensuring cool air from the room can be drawn in through the condensing coil and out the other side.

Warning

Do not install unit in draughty conditions where the air movement is greater than 0.2mtr/sec.
e.g. near entrance/exit doors, open windows, under air conditioning units or a ceiling mounted fan
Do not install units where there is high radiated heat, e.g. direct sunlight, room heaters, or bright spot lights.
Ambient room conditions must not exceed 25°C or a relative humidity of 60%.
Blocked vents will cause reduced refrigeration efficiency and lead to malfunction
