

Overview

Counter units made to utilise the extensive range of Moffat Drop-In displays and Roll-under hot cupboards.

The robust pre-engineered base units are constructed in stainless steel.

There is three basic types of base unit

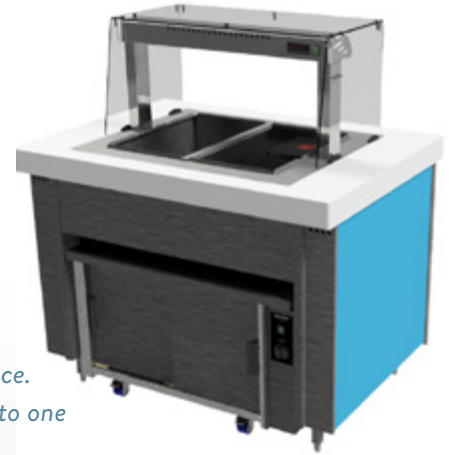

1. Ready made to accommodate refrigerated displays with air flow venting.
2. Section with ambient storage under
3. Units with a void space under where a roll under hot cupboard can be placed.

Composite tops can be made to any shape, they are fully sealed into one continuous piece.

When counter sections are joined together on-site the joins are fully bonded together into one piece and polished. Providing a very hygienic option.

Scratches and chips can be repaired on site, polished up leaving no sign of the damage.

The tops are made up of a laminate of 13mm thick Corian and 25mm thick MDF bonded together.

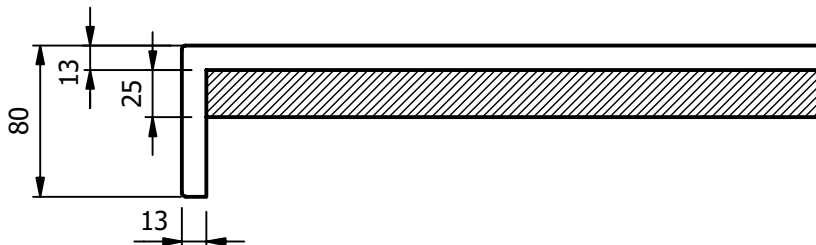

Key Features:

- Very hygienic
- One piece counter top finish
- Wide and varied choice of colours
- Designed to accommodate Moffat drop-In and Roll Under range of products.

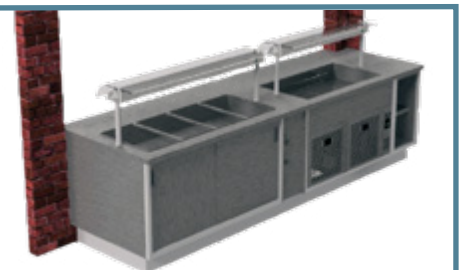

Note : The standard profile on Corian counters is 80mm deep.

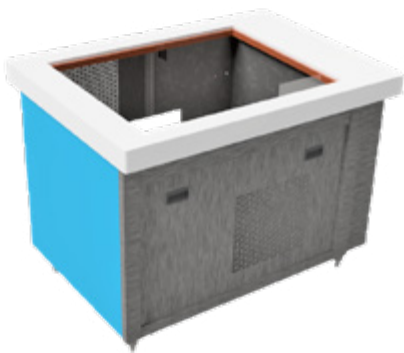

MOFFAT
COUNTER-TEK
 — Specialised Servery Systems —

Each model can be made part of a specially designed bespoke Moffat servery counter.

1. Base units made to suit refrigerated displays models.

Model CC2.
(With straight through ventilation and lift out panels)
Suitable for a size 2 refrigerated models)
